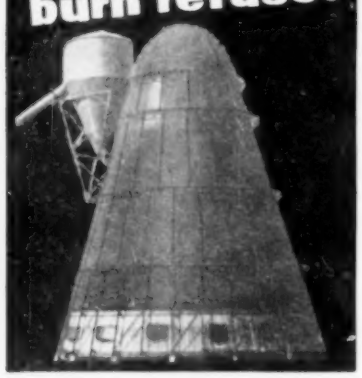
Your best way to burn refuse!


Burns refuse from 3000 bushels of corn per hour . . .
COMPARE!
• Much faster.
• Safer, often lowers insurance rates.
• Burns more completely.
• Feeds automatically.
• Seldom requires cleaning.
• Blower speeds burning of damp refuse.
• Needs no watchman.
• Saves moving refuse far from plant for burning.
• Passes safety and Forest Service requirements.
• Only Rees Burners are proven for grain-mill refuse.
Built With 40 Years of Experience
Unconditionally guaranteed better than other burners of this type. A Rees Burner costs much less than you think. Mass production for such firms as Quaker Oats, Long Bell Lumber Co., Ford Motor Co., and many others makes the price quite low. Your plant labor can easily erect a Rees Burner in a few days. No crane needed. We will manage construction, if desired.

SAFE

THANKS TO TETRAKOTE

APPLIED DURING FALL-WINTER TURNING

Millions of bushels of corn, milo, wheat and other grains are in safe bug-free storage. TETRAKOTE is standing guard with its invisible protective residue on each kernel.

TETRAKOTE is easily applied while turning to cool . . . equally effective in vertical or flat storage. Protects up to one year or longer for 2c per bushel or less . . . stops need for later turning due to infestation "hot spots".

QUIET VIBRATOR

CUTS OPERATING NOISE

Vibrator noise is sometimes objectionable, especially when vibrators are used in close proximity to personnel for extended periods.

The Cleveland Vibrator Company offers two types of vibrators to solve this problem. They are the RC and the AC vibrators.

The RC's are electric and operate on a rotating eccentric weight principle. They are an enclosed electric motor with rotating, cam-like weights on each end. The RC's make no more noise than a standard motor.

The AC's are similar to standard Cleveland Vibrators, except that the piston stroke is cushioned by a pocket of air. While noise is not eliminated, it is reduced to an unobjectionable level.
